

# Javalina® *The Original and Still the Best!*

**CLICK:** A strong retraction mechanism is the sign of a quality pen. Our mechanism provides over 10,000 clicks. Your hand will tire before the Javalina®!

**CLIP:** Strength is the key to our clip. It can withstand up to 15 pounds of force.

**24 HOUR SERVICE:** This super service is available on all of our plastic pens. You'll be your clients hero!

**Product Safety:** All Hub Pen products comply with California's Proposition 65 and all other national safety standards. Ask us for the safety sheet

**IMPRINT:** We use the finest Hi-Tensile polyester mesh for our screens. This results in a crisp, clean logo with tight registration.

**BARREL:** High quality ABS plastic provides a strong barrel that is non-porous and provides true colors.

**BALL:** We only use tungsten carbide balls. Only a diamond is a harder substance!

**INK:** Our proprietary ink recipe is the key to the Javalina®'s success. It lays down 1 ½ times the ink of a normal ballpoint pen thereby ensuring a smooth writing experience from the time the tip hits the paper!

**How do you know it's an original Javalina®?**  
Check the ink cartridge. All genuine Javalina® pen cartridges have Hub Pen's name manufactured right into the plastic.

**Don't fall for the imitations!**  
Many suppliers have tried to capitalize on the popularity of this outstanding pen and its proprietary ink refill by marketing weak imitations.
